**Tags:** [Nutrition](#), [Nutrition Innovation Lab](#)

This upcoming webinar is co-hosted by [Feed the Future Innovation Lab for Nutrition](#) and USAID Advancing Nutrition. Designed to inform and engage stakeholders, this webinar is part of a series that will cover research conducted by the Innovation Lab for Nutrition and its stakeholders over the past ten years. During each webinar, panelists will present findings from their research, discuss policy implications of these findings, discuss what needs to be done to better link research to practice, and identify research gaps for future consideration.

Many factors combine to shape diets and maternal and child health. In this webinar, we review recent research from the Feed the Future Innovation Lab for Nutrition regarding the role of markets and infrastructure in mitigating nutritional risks. We focus specific attention on findings from Bangladesh, Nepal and Uganda, examining correlates and drivers of dietary diversity, linear growth and weight gain, and nutritional resilience.

## Panelists:

**Dr. Will Masters** is an Investigator for the Innovation Lab for Nutrition and a Professor at Tufts University in the Friedman School of Nutrition with a secondary appointment in the Department of Economics.

**Dr. Gerald Shively** is a PI for the Innovation Lab for Nutrition, the Associate Dean and Director for the International Programs in Agriculture, Faculty Fellow for Global Affairs, and Professor of Agricultural Economics at Purdue University.

## Moderator:

**Dr. Shibani Ghosh** is the Associate Director for the U.S. Government's Feed the Future Innovation Lab for Nutrition and a Research Associate Professor at the Friedman School of Nutrition Science and Policy, Tufts University.
